

UNDERGRADUATE FINAL PROJECTS 2019/18

ADDENDUM 1

COMPUTER SCIENCE DEPARTMENT
THE FACULTY OF NATURAL SCIENCES
ARIEL UNIVERSITY

Dear students,

please adhere to the following additional instructions regarding Abstract submissions in the shared Google folder designated for that purpose.

- Come the 17th of November, 2018 we expect to have all names of senior staff members who are actively advising projects this year. Shortly after this date we will place a sub-folder baring the name of each such staff member in the shared Google folder designated for abstract submissions.
- Upon submission of your abstract you are to first search the shared Google folder for a sub-folder baring the name of your advisor.
- In the folder baring the name of your advisor open a new folder baring the title of your project.
- Upload the files requested of you for this specific submission into the folder you created.

The following policy will be observed and enacted.

- After the deadline for abstract submission the shared folder will be locked and no further changes will be possible.
- All files found in the folder that do not adhere to the above folder structure will be automatically erased and their associated submissions will be rejected penalties of missed abstract submission will apply.
- The folders created during abstract submission will be used in all subsequent submissions. That is, all folders from the Abstract Google folder will be dragged to the Commitment Document folder and then submissions of the latter will be with respect to the same folder structure.

Important comment. No student is allowed to open a folder baring the name of his or her advisor. We do that. It is highly recommended that you view the folder with ample time prior to the abstract submission to verify that there is a folder baring the name of your advisor. If you see that there is no such folder you are to contact Dr. Elad Aigner-Horev and inform him of that. If you notice this too soon to the deadline and then send us an email informing us of this and in the meantime the deadline passes we will count this as a late submission.
